 Responsive to communication(s) filed on <u>24 November 2003</u>. This action is FINAL. 2b) This action is non-final. Since this application is in condition for allowance except for formal matters, prosecution as to the merits is 					
 2a) ☐ This action is FINAL. 2b) ☑ This action is non-final. 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is 					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213					
2.2.2.2.2.2.2.2.2.2.2.2.2.2.2.2.2.2.2.					
Disposition of Claims					
4)⊠ Claim(s) <u>1-26</u> is/are pending in the application.					
4a) Of the above claim(s) is/are withdrawn from consideration.					
5) Claim(s) <u>12-26</u> is/are allowed.					
6)⊠ Claim(s) <u>1,10 and 11</u> is/are rejected.					
7) Claim(s) <u>2-9</u> is/are objected to.					
8) Claim(s) are subject to restriction and/or election requirement.					
Application Papers					
9) The specification is objected to by the Examiner.					
10)⊠ The drawing(s) filed on <u>30 June 2003</u> is/are: a)⊠ accepted or b)□ objected to by the Examiner.					
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).					
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).					
11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.					
Priority under 35 U.S.C. § 119					
12)⊠ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a)⊠ All b)□ Some * c)□ None of:					
1. Certified copies of the priority documents have been received.					
2. Certified copies of the priority documents have been received in Application No					
3. Copies of the certified copies of the priority documents have been received in this National Stage					
application from the International Bureau (PCT Rule 17.2(a)).					
* See the attached detailed Office action for a list of the certified copies not received.					
Attachment(s)					
1) Notice of References Cited (PTO-892) 4) Interview Summary (PTO-413)					
2) Notice of Draftsperson's Patent Drawing Review (PTO-948) 3) Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08) Paper No(s)/Mail Date 5) Notice of Informal Patent Application (PTO-152)					
Paper No(s)/Mail Date 6) Other:					

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Mase et al (US 6,236,064 B1).

Mase discloses, in Fig. 1, a device, comprising a gate line (Vgg1) and a data line (Vdd1) formed over a substrate (50 in Fig. 4C), the gate and data lines perpendicularly crossing each other and defining a pixel therebetween, a first driving unit (a first complementary TFT pair) formed in the pixel and comprised of a first switching TFT (a first TFT of the first pair) and a first driving TFT (a second TFT of the first pair), a power line (col. 10, lines 65-67) delivering a current signal to the first driving TFT, an organic electroluminescent diode (6, col. 20, lines 52-54) contacting the first driving TFT and receiving the current signal from the first driving TFT, and a second driving unit (a second complementary TFT pair) formed in the pixel and comprised of a second switching TFT (s first TFT of the second pair) and a second driving TFT (a second TFT of the second pair), the second driving unit being a backup circuit that can deliver the current signal from the power line to the organic electroluminescent diode when the first driving unit malfunctions (col. 3, lines 19-48).

Application/Control Number: 10/609,025 Page 3

Art Unit: 2821

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 10-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mase in view of Prior Art (specification of the instant application).

Mase discloses substantially the claimed invention as noted above in claim 1. However, Mase does not suggest the diode including an organic layer between an anode and cathode. Prior art discloses the organic electroluminescent diode includes an anode electrode, a cathode electrode and an organic luminous layer between the anode and cathode electrodes (page 2, paragraph [0003]), the anode electrode is transparent and the organic luminous layer includes a hole transporting layer, an emission layer and an electron transporting layer in sequential order from the anode electrode (Fig. 1 of the instant application). It would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the diode as taught in the Prior Art to Mase's device in order to improve the life span of the diode as well as the electroluminescent device.

Allowable Subject Matter

- 5. Claims 2-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Claims 12-26 are presently allowed.

Art Unit: 2821

7. The following is a statement of reasons for the indication of allowable subject matter:

Page 4

The cited art of record fail to teach the first and second switching TFTs and the first and second driving TFTs are connected as defined on lines 2-15 of claim 2, or an organic electroluminescent device comprising first driving unit formed in the pixel and comprised of first and second switching TFTS and first and second driving TFTS, and a second driving unit formed in the pixel and comprised of third and fourth switching TFTS and third and fourth driving TFTS, the second driving unit being a backup circuit that can deliver the current signal from the power line to the organic electroluminescent diode when the first driving unit malfunctions as defined in claim 12.

Inquiry

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Trinh Vo Dinh whose telephone number is (571) 272-1821. The examiner can normally be reached on Monday to Friday from 9:30AM to 6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong, can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
